

```
cache_aligned_allocator  
::operator=
```

The diagram illustrates a call to the overloaded `operator=` method of the `cache_aligned_allocator` class. A grey box on the left contains the text `cache_aligned_allocator::operator=`. A straight blue arrow points from this box to a white box on the right. The white box contains the text `cache_aligned_allocator::cache_aligned_allocator`, representing the constructor call. A curved blue arrow points from the top of the white box back to itself, indicating a self-call or a recursive reference.

```
cache_aligned_allocator  
::cache_aligned_allocator
```
