

fqueue::operator=

fqueue::operator=

fqueue::operator=

fqueue::~~fqueue

```
graph LR; A[fqueue::operator=] --> D[fqueue::~~fqueue]; B[fqueue::operator=] --> D; C[fqueue::operator=] --> D;
```

The diagram illustrates a control flow or dependency. On the left, there are three white rectangular boxes, each containing the text 'fqueue::operator='. On the right, there is a single gray rectangular box containing the text 'fqueue::~~fqueue'. Three blue arrows originate from the right side of each 'fqueue::operator=' box and point towards the left side of the 'fqueue::~~fqueue' box. The arrows from the top and bottom boxes are angled, while the arrow from the middle box is horizontal.
