

atomic_int64_t

```
graph BT; mutex[mutex] -.->|m_back| atomic_int64_t[atomic_int64_t]; mutex -.->|m_front| atomic_int64_t;
```

The diagram illustrates a relationship between a `mutex` and an `atomic_int64_t` variable. A grey box labeled `mutex` is at the bottom, and a white box labeled `atomic_int64_t` is at the top. A dashed purple line connects them, with a solid purple arrowhead pointing towards the `atomic_int64_t` box. The labels `m_back` and `m_front` are placed along this dashed line, indicating that the `mutex` holds pointers to the `atomic_int64_t` variable.
